La produzione di utensili speciali soddisfa specifiche richieste che per forma, dimensioni, tipo di attacco, produttività, etc. non trovano riscontro nella gamma di utensili di serie.

Se la richiesta riporta tutti i dati utili alla progettazione degli utensili speciali, relativi sia al materiale da fresare che alle caratteristiche tecniche della macchina usata, questi offriranno il miglior rendimento sia produttivo che qualitativo.

## Special tools

The production of custom-made tools satisfies specific requirements connected to the shape, size, type of shank, productivity, etc. that cannot be found in the range of the standard tools.

If the request includes all the relevant information regarding the design of the special tools, connected to the material to be machined and to the technical data of the machine used, then we will be able to offer the best performance both in productivity and quality.

## Outils speciaux

La production d'outils speciaux satisfait demandes particulière que pour forme, dimensions, modèle de queue, productivité etc. ne trouvent pas confirmation dans la gamme d'outils de série.

Si la demande mentionne tous les éléments nécessaires pour le plan des outils speciaux, relatifs soit à le materiel à fraiser que aux caractéristiques techniques de la machine utilisée, ceux offriront le meilleure rendement de production et qualitatif.

## Herramientas especiales

La produccion de herramientas especiales satisfa las peticiones que per forma, dimensiones, tipo de mango, productividad, etc. no corresponden a la gama de herramientas producidas en serie.

Si la peticion tiene todos los datos necesario a la creacion de las herramientas especiales, relativos tanto al material de fresar como a las características técnicas de la maquina usada, estas herramientas ofreceran el mejor rendimiento productivo y cualitativo.

## Werkzeuge in Sonderfertigung

Die Herstellung der Werkzeuge in Sonderfertigung befriedige die Anfragen, dass für Form, Dimensionen, Schaftabmessung, Produktivität, usw in Serie hergestellten sind nicht.

Wenn die Anfrage alle nützliche Auskünfte, wie das Material zu fräsen und die technische Daten der gebrauchte Maschine enthält, die Werkzeuge die bessere Produktiv-und-Qualitativleistung haben.
